

JNI Oncology Lectures

www.erasmusmc.nl/pathologie
Program September 2018 – June 2019

October 10

PETER BLACK

Vancouver Prostate Centre, Canada
Translating bladder cancer genomics into clinical practice
ROOM: SP-2407

November 28

MARIE JOSE GOUMANS

LUMC, Leiden
Growth factor signaling

January 23

TOM WURDINGER

VUMC, Amsterdam
Tumor-educated platelets: liquid biopsies for the detection of cancer

February 27

BAS VAN STEENSEL

NKI, Amsterdam
Large-scale perturbation approaches to study genome organization and function

March 27

ILARIA MALANCHI

The Francis Crick Institute London
Metastatic microenvironment context matters

April 24

DENIS LAFONTAINE

Université Libre de Bruxelles
The involvement of ribosome biogenesis in cancer

May 22

ELLEN HEITZER

BioMedizin, Graz
Circulating tumor DNA—promises, challenges and future perspectives

June 26

SERENA NIK-ZAINAL

University of Cambridge
Advances in the field of mutational signatures
